

Important Insurance Information

Thank you for choosing West Family Dentistry

West Family Dentistry does our best to make the most out of your insurance benefits. We verify all benefits and percentage levels so that we can give you, our patients the most accurate estimate. Even though we are providers for MetLife and Delta Dental Premier and offer those fee schedules, insurance companies reserve the right to lower your benefits and not pay what they have told us. Unfortunately we cannot always guarantee that our estimates are 100% accurate because of this fact.

For example: Our office only uses composite material for our fillings (white colored) and we do not use amalgam (silver). Insurance companies reserve the right to reduce your benefits and pay at a lower amalgam rate. The patient unfortunately is responsible for the difference.

Dental insurance is intended to cover some, but not all cost of your dental care. Most plans have an individual yearly maximum and a deductible. We will file your insurance claims for you and will work with you to ensure that you receive the maximum benefits to which you are entitled. Please keep in mind that reimbursement amounts are not, and never have been a guideline for quality care.

I have read and understand that I am responsible for the difference that my insurance company does not pay for.
